

The first platform provider for ship's waste management

Founded in 2013 in Oldenburg Top Glory Marine Service GmbH & Co. KG is the first platform provider for ship's waste management worldwide. The platform consists of waste disposal companies and ship owners/ managers. Using economies of scale and by the development of a customized offload-strategy we can achieve lower prices for the disposal of MARPOL relevant materials.

With a constantly growing network of waste disposal companies in ports all over the world around 315 ships are regularly served. Our team of 19 experts from waste management and shipping industry works from six offices located in the main trading areas of our customers always focused on their requirement and facing the challenges.

The participating waste management companies are regularly audited by our HSEQ department. A real-time ranking of preferred suppliers in the ports benchmarked on successful carried out services guarantees the choice of the best disposal company.

Members of the platform also benefit from our SPRO service through our branch office in China. We support ship owners in this regard and offer a 24/7 service with German contact persons.

In Addition to this we offer our customers a complete documentation of all services done in order to achieve high transparency and support companies with ISO 9001 and ISO 14001 certification. The processing of our services is carried out completely via our Enviro Fleet Cloud and can be viewed with a customer access.

Money makes the world go round

We develop a customized offload-strategy for your fleet by preparing a waste management plan according to the ship's schedule for all waste streams generated on board. By this cost-effective disposal can be guaranteed. Through the platform character a strong market power will be achieved and allows lower fees for sludge and garbage disposal in ports.

All around the clock

We provide a 24/7 service of an experienced team. If you decide to be a member of the platform no additional workload will be generated in the office or on board the ships.

Jump on the digital train!

Via the TGM owned EnviroFleetCloud members have direct access and full transparency through the real-time analysis on offloaded waste streams per vessel, fleet and per customized time period. The cloud guarantees a complete documentation which supports especially ISO14001 and ISO9001 certified companies.

Everywhere ? Everywhere !

The TGM worldwide network of disposal companies is audited by TGM HSEQ department. We realize a real-time ranking of preferred companies inside the ports benchmarked on successful carried out services. Branch offices of TGM in the hotspots of the global shipping industry and the main trading areas of our members are supporting same in every respect.

Ni Hao

Our TGM branch office in Tianjin, China additionally supports our members regarding the issuance of SPRO agreements and coverage certificates on a lower-cost basis especially in most frequent ports like Qingdao, Dalian, Xiamen and many more.
